8. Brainstorming

- Graficar como puntos/grafos
- Pensarlo al revez
- ¿Que propiedades debe cumplir una solución?
- Si existe una solución, ¿existe otra más simple?
- ¿Hay elecciones independientes?
- ¿El proceso es parecido a un algoritmo conocido?
- Si se busca calcular $f(x)$ para todo x, calcular cuánto contribuye x a $f(y)$ para los otros y
- Definiciones e identidades: ¿*que significa* que un array sea palindromo? (ejemplo)
